

## Super-midsize private jet.

The Gulfstream G200 is designed for passengers who need more space, comfort, and range than a light jet can offer. For passengers spending several hours in the air, the G200 provides the extra space and comfort that make a difference.

The spacious cabin accommodates up to nine passengers and offers plenty of room to work, relax, or simply enjoy the flight. Starlink Mini Wi-Fi is available on board, allowing passengers to stay connected, browse emails, and keep up with work while travelling.

With its combination of range, speed, and cabin comfort, the G200 is a practical choice for both short and long-haul private travel.
